Subject: inmate Phone Vendor Recommendation

Purchasing will have the recommendation for award of the inmate phone vendor on for March 11, 2008. As we work on the briefing to Commissioners Court. I am also working on the backup information that will be available only to Court members until an official contract is executed.

Attached is a worksheet with two matrices in it. One is the "Best Proposal" - this includes revenue, rates, contractual issues, MWBE participation, functionality. GTL is the recommended vendor for this category for all three options (record/maintain visitation phones, maintain visitation phones, no services to visitation phones).

The second is "Best Revenue" - this snapshot only looks at the potential revenue to be received. Unisys is the recommended vendor for this category for all three options (record/maintain visitation phones, maintain visitation phones, no services to visitation phones).

I need to take a closer look at the MWBE information for GTL to determine if the amount listed is an annual amount or full term of contract amount.

We should have a draft of the briefing to share by Tuesday.

If anyone has any other suggestions for presenting the data, please let me know.
