Subject: Briefing Document for Recommendation

Attached is the briefing document to be submitted to Commissioners Court for the recommendation on the Inmate Phone contract. Just a reminder, this information is meant to be vague because we cannot disclose specific information to the public until a contract is executed. Commissioners Court members will receive the additional information on the specific rates/revenue and other factors that I shared earlier in the week.

My plan is to mention the option of just addressing review (with Unisys as the recommended vendor in that scenario) in the information provided to the Court members.

Again, if you see that I have missed anything or need to make changes, don't be afraid to speak up.
