- **Activation of New System:** Once the new network infrastructure has passed testing and certification, the Court's designated IT personnel will coordinate with the contractor to activate the new system, transferring data and communications traffic from the old infrastructure to the new setup.
- **Monitoring Period:** After activation, the contractor will monitor the new system's performance for any initial connectivity issues, ensuring uninterrupted operation and quickly addressing any issues that may arise during the transition.

#### **2. Approach for Safe Removal of Old Cables**

- **Disconnection and Identification:** Following the cut-over, the contractor will systematically disconnect old cables from each workstation jack and identify them for removal, beginning at the user-end and following through to the IDF. Clear labeling of disconnected cables will ensure no new cabling is disturbed during this process.
- **Controlled Cable Removal:** Old cables will be pulled back from each termination point to the IDF, avoiding entanglement with the new cables. Cables should be carefully extracted to prevent any impact on the new system. If necessary, small sections of the ceiling or wall access points may be temporarily adjusted to ensure a smooth removal process.

## **Lubbock U.S. District Court Structured Cabling - Statement of Work**

- **Disposal:** Once removed, the contractor is responsible for the disposal of all decommissioned cables per federal guidelines, ensuring safe and environmentally responsible practices.

### **3. Final Steps to Secure New Cables, Jacks, and Faceplates**

- **Faceplate and Jack Installation:** After the removal of old cables, the contractor will secure the new cables by affixing each cable to its designated faceplate or wall box at the workstation. Faceplates will be tightened and aligned, ensuring they are flush with wall surfaces and securely mounted.
  - **Cable Securing:** Each cable will be anchored securely in the wall box, preventing movement or strain on jacks and terminations. The contractor will verify that all cable support mechanisms, such as hangers or conduit attachments, are properly installed along the cabling route from the IDF to the workstation.
  - **Label Verification and Documentation Update:** To conclude, the contractor will conduct a final check to confirm that all labels are correctly placed and visible per TIA-606 standards. ## PROVISIONS & CLAUSES

### **Certification Regarding Debarment, Suspension, Proposed Debarment, and Other Responsibility Matters (MAR 2019)**

(a)(1) The offeror certifies, to the best of its knowledge and belief, that:

(i) the offeror and/or any of its principals:

(A) are \_\_\_ are not \_\_\_ presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any federal agency;

(B) have \_\_\_ have not \_\_\_, within the three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal, state, or local) contract or subcontract; violation of federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating federal criminal tax laws, or receiving stolen property;

(C) are \_\_\_ are not \_\_\_ presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision;

(D) have \_\_\_, have not \_\_\_, within a three-year period preceding this offer, been notified of any delinquent federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(1)- Federal taxes are considered delinquent if both of the following criteria apply:

(i) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2)-Examples.

(i) The taxpayer has received a statutory notice of deficiency, under I.R.C. § 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. § 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax

Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. § 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under [11 U.S.C. § 362](#) (the Bankruptcy Code).

(ii) The offeror \_\_\_ has \_\_\_ has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any federal agency.

(2) "Principal," for the purposes of this certification, means an officer; director; owner; partner or a person having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a division, or business segment, and similar positions).

This certification concerns a matter within the jurisdiction of an agency of the United States and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under [18 U.S.C. § 1001](#).

(b) The offeror shall provide immediate written notice to the contracting officer if, at any time prior to contract award, the offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the offeror's responsibility. Failure of the offeror to furnish a certification or provide such additional information as requested by the contracting officer may render the offeror nonresponsible.

(d) Nothing contained in the foregoing will be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the offeror knowingly rendered an erroneous certification, in addition to other remedies available to the judiciary, the contracting officer may terminate the contract resulting from this solicitation for default.
